The Application has further been found to be directed to more than one species of the generic invention. Specifically, election of species A (claims 15-40) or species B (generic claims 1-14) has been required. Applicants respectfully disagree with the Action's conclusions regarding the species and subspecies and believe the claims could properly be examined together. For example, it does not appear that it would present an undue burden to search the various dependent claims.

Accordingly, Applicants request that the Examiner reconsider the restriction but elect species B (claims 1-14) with traverse.

Separately, Applicants wish to thank the Examiner for his time in reviewing the restriction over the telephone. Although the merits of the claims and related restriction were not discussed, the Examiner's explanation was helpful in determining how to proceed.
